

PATIENT CARE

PALLIATIVE CARE

Palliative care is for patients with prolonged, serious health conditions that become life limiting.

It gives relief from physical illnesses & mental distress that limits their quality of life.

Best quality of life

Medical teams of doctors, nurses, nutritionists and chaplains.

Individual care plans

Guidance with critical healthcare decisions and treatment options

Family members can get support

HOSPICE CARE

Hospice care provides comfort care for those in the last six months of their lives.

Access to support 24/7.

Patients may be cared for in their homes, hospitals, nursing & group homes or hospice residences.
